Glow™

smartTrike's 4 in 1 tricycle designed for babies **from 10 months** that grows with the child and gives added value! With the lightest touch the Glow™ maneuvers like a stroller. The unique navigator button on the mudguard lets one switch from parent Touch Steering® to child ride-control. Built-in suspension gives baby a 100% comfort ride.

Stage 1: At 10 months baby safely uses foot rest & has a padded high-back support.

Stage 2: At 18 months the seat converts while parents push and control the trike.

Baby enjoys the ride while developing confidence, balance & motor skills.

Stage 3: At 24 months it becomes a training trike - kids learn to pedal.

Stage 4: At 30 months, remove parent handle, switch navigator button and the product becomes an independent trike that kids pedal by themselves.

The functional, washable, padded seat cover coordinated with canopy, parent bag & large multi-purpose storage bag gives a trendy, fashionable look to the product! Versatile and safe – it's the adorable convertible
