Status indicators

as described in column "St" of segment details

(R)equired

Indicates that the entity is required and must be sent. (This status is set by EANCOM®.)

(O)ptional

Indicates that the entity is conditional and may be sent at the discretion of the user.

(D)ependent

Indicates that the entity must be sent in certain conditions, as defined by the relevant explanatory note.

(A)dvised

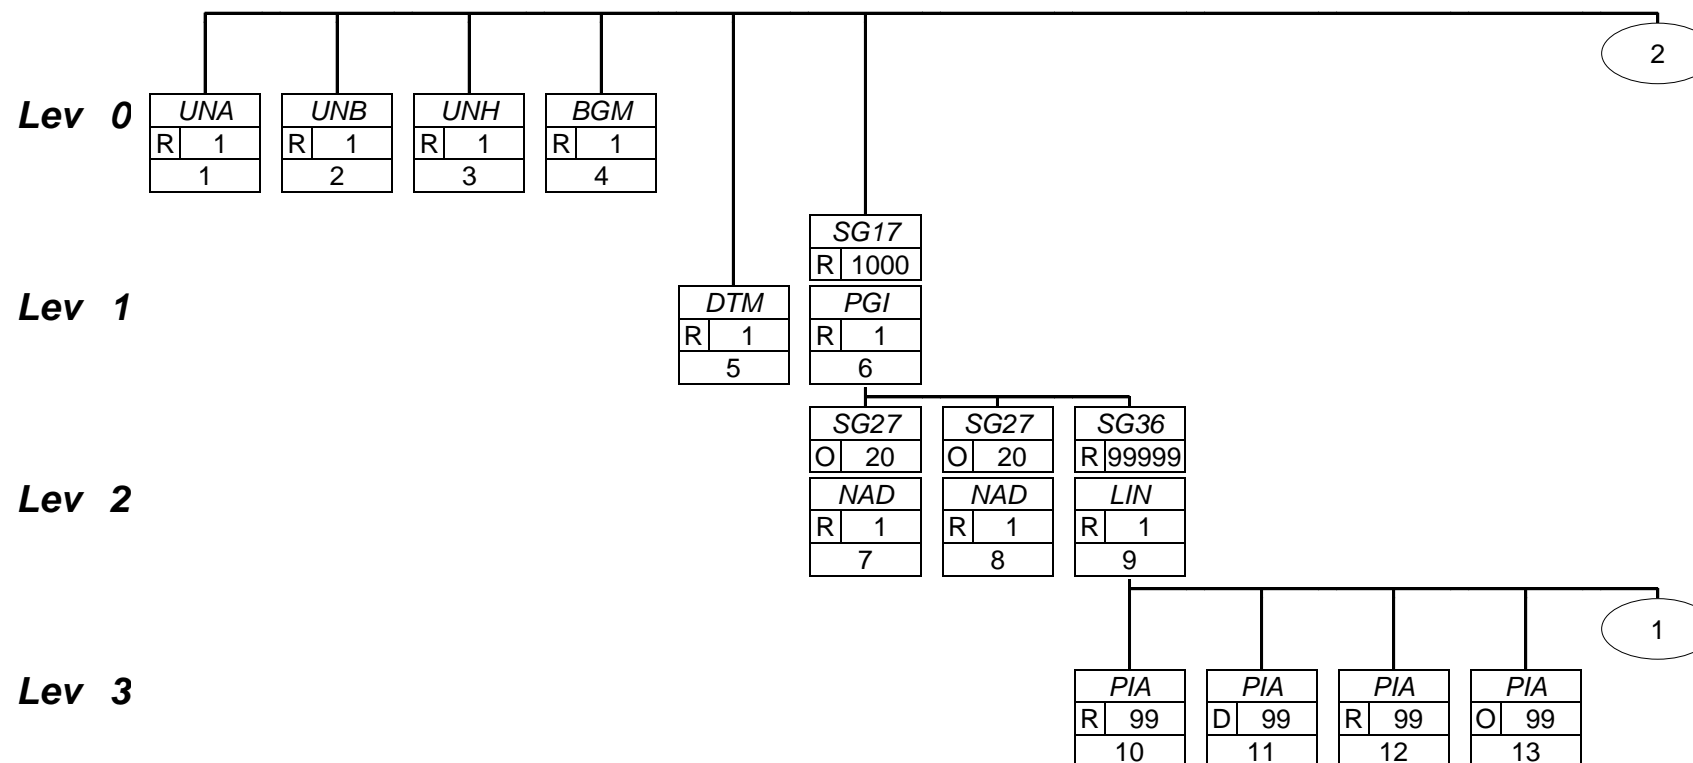

Indicates that the entity is being advised.

(N)ot used

Indicates that the entity is not used.

Segments Layout

Segment**UNA**No.: 1
Status RLevel: 0
Max. occ.: 1**Service string advice****Description Service string advice**

Description	Manor	Example	Remarks
UNA1 Component data element separator	R an1	:	Used as a separator between component data elements contained within a composite data element (value: ":").
UNA2 Data element separator	R an1	+	Used to separate two simple or composite data elements (value: "+").
UNA3 Decimal mark	R an1	.	Used to indicate the character used for decimal notation (value: ".").
UNA4 Release character	R an1	?	Used to restore any service character to its original specification (value: "?").
UNA5 Repetition separator	R an1	*	Used to indicate the character used for repetition separation (value: " * ").
UNA6 Segment terminator	R an1	'	Used to indicate the end of segment data (value: " ' ").

This segment is used to inform the receiver of the interchange about the set of service characters (and decimal mark) which are being used. It must immediately precede the UNB segment and contains the five service characters (positions UNA1, UNA2, UNA3, UNA4, UNA5 and UNA6) selected by the interchange sender. When expressing the service characters in the UNA segment, it is not necessary to include any element separators. Within EANCOM®, using the default set of Service characters, the use of the UNA segment is not required.

Example:

UNA:+.?'*

- For further information about how to use GPC, consult the GPC Basics training and the GPC Access Guide
- Give us your feedback!** Send an email to Jean Christophe Gilbert at jeanchristophe.gilbert@gs1fr.org
- To access and download the GPC schemas in Excel and XML format, please view the [GPC Published Standards](#)
- The GS1 GPC is a system that gives buyers and sellers a common language for grouping products in the same way, everywhere in the world. The official (normative) GPC schema and GPC Browser information is published in Oxford English. Both the schema and the browser information are translated to other languages.
